ABOUT US

Our company was established in 1998 and throughout the years we have always followed a few basic principles in our relationships with customers and partners - openness, flexibility and correctness.

We build trust by working closely with our customers and partners. To meet their needs in short-terms we maintain a high level technology park and our high qualified staff is always there to offer the best solutions guaranteeing excellent quality.

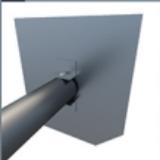

The organisational structure of the company is created to cover the full cycle of activities— from professional consultancy, measure-taking, design, production and installation to warranty and post-warranty service.

(with rubber and brush seals)

2 Reinforced endplates

3 Box covers

4 Electrical motor

5 Spring box

6 Photocells

7 Receiver box & remote

8 Galvanised steel slat

somfy.

Benefits of non-insulated roller door

With roller door the light opening is used most effectively. The box is not visible from the outside which contributes for the simple and elegant façade appearance.

The guides are extremely strong and made of 2 mm galvanised steel. The brush and rubber seals provide for minimal noise and maximum sealing.

All of the essential components we use are high quality and comply with the endurance standards. The profiles are galvanised and powder coated which protects them from corrosion. We use the latest production and installing technologies as we know our products must guarantee reliability to the clients.

PANDÖRA

Design that combines robustness and visibility and ensures proper ventila-

The “Mosquito” slat

Security, Elegance, Comfort

Where should I use it?

The “mosquito” slat is a beautiful security solution for shopping centers, shops, offices or wherever the customers want to keep the visibility to the property without compromising with the security.

The curtain

Design that combines robustness, visibility and ensures proper ventilation.

The slat is made of 0.7 mm powder polymer coated galvanised steel, giving your shop or office the desired high security level.

The “Elegant vision” box

The box consists of three parts. The top, bottom and back lids are beautifully designed to hide the rolling mechanism without reducing the service accessibility. What is more, is the possibility for every part of the box to exist separately. This gives customer the flexibility to choose the best option for him.

The Ellipse perforation

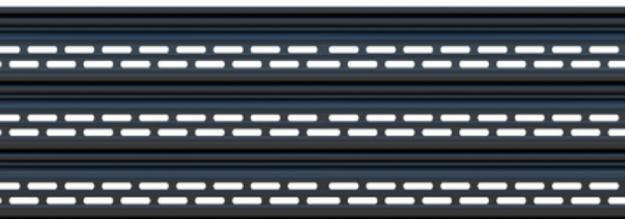

This variation is designed to bring attention to your shop, office or building. The Ellipse perforation gives the professional classical look of your property. Stand out from the crowd with this elegant configuration.

The technical characteristics are to the highest standards, so do not let the beautiful design mislead you. The thickness of the curtain is 0.7 mm powder polymer coated galvanised steel which does not compromise with the security level.

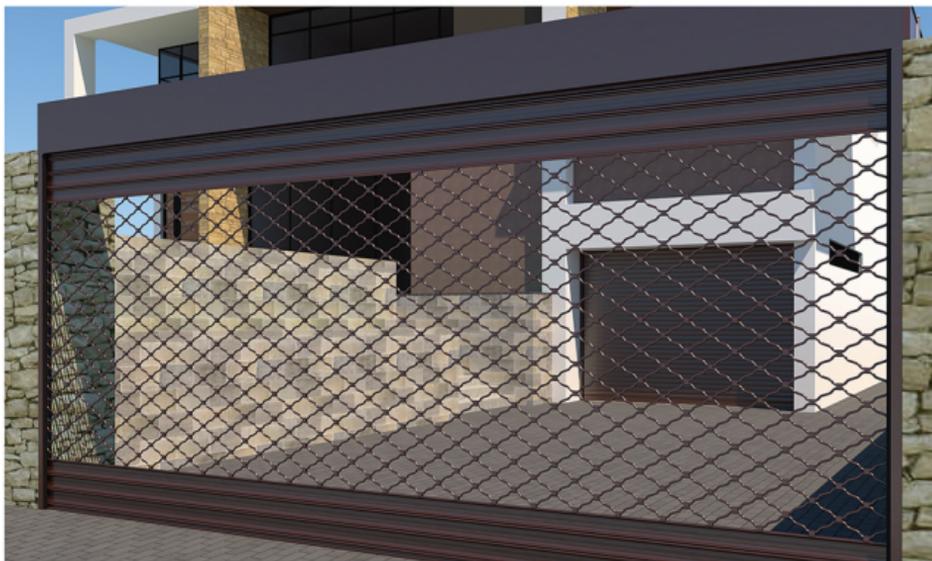

Ventilation and visibility are some of the benefits of these slats which can be used in different situations. The sky is the limit. We are proud manufacturers and all our products are granted with 5 years warranty period.

You can choose unlimited amount of colours from the RAL catalogue. We are happy to produce the perfect roller door for you.

All colours are available without surcharge. All shutters are made to measure.

Elegant security solution for an adventurer with attention to the detail.

“Diamond” shaped roller grilles

Roller Grilles are strong and provide maximum security and good visibility to the premises' interior.

The curtain

The curtain is made of 8 mm galvanised reinforced steel sticks which are attached to each other with pre-galvanised steel hinges overlaid with powder polymer coating.

The guides

Extremely strong omega profiles made of 2 mm galvanised steel. The side guide's brush and rubber seals provide for the minimal noise and maximum sealing while the roller shutter is in motion.

Powder Polymer Coating

The paint we use is weatherproof and is tested to extreme weather conditions. We guarantee its colour durability and corrosion resistance.

Through colour you can turn your roller grille into a part of the building façade and thus to give it an aesthetic appearance perfection.

The “Diamond” mesh curtain is made of 8 mm galvanised reinforced steel sticks which are attached to each other with pre-galvanized steel hinges overlaid with powder polymer coating.

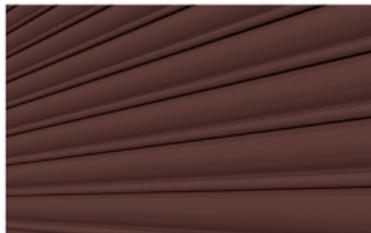

Windproof roller

Wind resistant roller doors are made to measure in a range of different resistances based on your needs, the curtain may be manufactured in a number of different ways and using a number of different materials. However, in a general sense, each slat is connected to another slat using a secure and "minimum movement", continually interlocking system.

The compact dimensions of the box, the photocells, the two transmitters and the full "Elegant vision" box, including all RAL colour variations, as well as the omega guides with rubber and brush sealings are included as standard in this package.

Windproof doors are created to withstand severe wind conditions, but however the slat design could be used for different purposes. From garage doors to industrial doors these slats could be used in every occasion. The assembly of the door could be the same as an ordinary non-insulated roller door.

The standard roller door package consists of slat or grille curtain, omega guides with rubber and brush sealings. The balancing mechanism filled with shaft, spring boxes and springs is covered by full "Elegant vision" box. The roller door is powered and controlled by Somfy electrical motor, receiver, two transmitters and photocells. All steel parts are galvanised and powder polymer coated. All RAL catalogue colours are included in the standard package. The standard roller door package comes with 5 year full warranty.

STANDARD PACKAGE

BUDGET PACKAGE

The budget roller door package consists of slat or grille curtain, omega guides with rubber and brush sealings. The balancing mechanism is filled with shaft, spring boxes and springs. The roller door is manually operated and it is secured by two secret locks on the both sides of the curtain. Regarding the dimension or customer preferences the doors could be fitted with one secret central lock which locks up in the guides. In the budget roller door package all steel parts come with galvanised finish. The budget roller door package comes with 2 year full warranty.

Colour options

Your roller shutter door makes up a huge portion of your property façade, meaning that it is normally the first thing that passers-by will notice about the appearance of your building. We know that alongside quality control, style, price and aesthetic appeal is a very important feature for any roller shutter door. With colour playing such a huge role, here in SBI Group International we are committed to satisfy every customer need by providing every colour range from the RAL catalogue without an additional surcharge. Giving you peace of mind by providing you with the opportunity to select the best colour match without compromising with the budget is one of the many things that differentiate us from our competitors.

Colours in print (such as this catalogue) are not necessarily the most accurate. If you would like a sample of our colours, we can send these out to you upon request.
